EXPERIENCE

UI/UX Designer at Technicul Cloud LLP, Mumbai **11/2024 – 10/2026**

UI/UX Designer with **2 years of experience** focused on designing user-centric and visually engaging **web and mobile interfaces**. Proficient in **Figma**, **wireframing**, and **prototyping**, with a strong understanding of usability and design systems. Additionally, has working knowledge of **frontend development (HTML, CSS)** and **basic graphic design skills**, including **logo design**.

EDUCATION

Bachelor of Computer Applications (BCA) **2022 – 2025**

LN College, Mumbai **Nashik University**

PROJECTS

Aqari53 – Real Estate Application

- Designed the UI/UX for Aqari53, a real estate application that enables users to buy, sell, and rent properties in a seamless and user-friendly way.
- Structured key user flows for property search, listing exploration, and inquiry process, improving overall navigation and usability.
- Improved information hierarchy by organizing property details (price, location, images) for better readability and faster decision-making.

Shipex – Logistics & Moving Application

- Worked on the UI/UX of Shipex, a logistics and relocation platform that enables users to manage home, office, and vehicle shifting smoothly.
- Defined interaction flows for service booking, order handling, and shipment tracking, making complex logistics processes easier to understand and use.
- Refined the presentation of service details, pricing, and order updates, ensuring better clarity and reducing confusion during booking.

Aru Cabs – Cab Booking Application

- Designed the UI/UX for a cab booking platform that enables users to schedule rides, track drivers in real-time, and manage local and outstation travel efficiently.
- Crafted smooth interaction flows for ride booking, driver tracking, and trip confirmation, ensuring a quick and hassle-free booking experience.
- Focused on improving ride planning and booking clarity by organizing fare details, ride options, and trip updates, making the overall journey more transparent and user-friendly
